

Seafood use through time & Consumer choice today

Heike K. Lotze (*Petersen professorship 2015*)

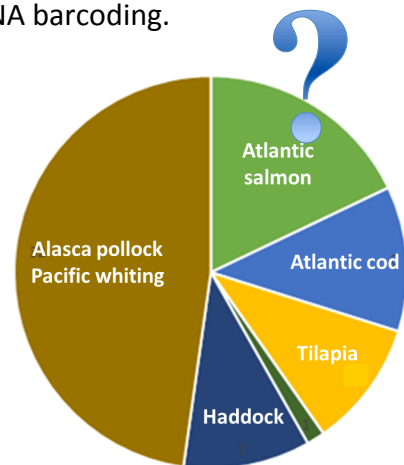

Thorsten Reusch & Felix Mittermayer

- Which seafoods have people eaten in the past?
- Where is our seafood coming from today?
- Does your fish vendor know what he sells?

In this 3-day course, we will discuss changes in seafood use by people through time, investigate the seafood choice consumers have today by surveying local fish stores and markets, and test whether the species you buy are really what they are through DNA barcoding.

WHEN & WHERE

- Tuesday 24.11. 14-17h small practical room West Shore
- Wednesday 25.11. 9-13h molecular lab EV
- Friday 27.11. 9-13h large practical room

Registration: Conny Rüther cruether@geomar.de
