

COMPASS Mentoring

Find your way -
Find your mentor!

The COMPASS Mentoring program provides **support in active and goal-oriented career development** for **postdoctoral researchers** and **science managers**.

Participants are guided in creating their individual career strategy and in finding their own mentor.

Mentors come from **multiple professional fields**, from academia as well as the industry, from public authorities or the non-profit sector.

The COMPASS Mentoring program is a joint initiative of the seven Helmholtz Centers in the research field Earth & Environment.

YOUR CONTRIBUTION AS A MENTOR

- **Share Knowledge:** You share your professional knowledge and offer advice to your mentee.
- **Invest Time:** You dedicate time to your mentee's development.
- **Provide Feedback:** You provide feedback on plans and goals, address risks and encourage the mentee to learn from their own experiences.
- **Transfer Knowledge:** You make your implicit knowledge transparent.

YOUR BENEFITS AS A MENTOR

- **Learn from Mentees:** You gain new perspectives through the exchange with your mentee.
- **Build Connections:** You expand your professional network.
- **Reflect on Your Career:** You reflect on your own professional journey and reflect your leadership style.
- **See Different Views:** You understand how people at different job levels think.

WORKSHOPS

A framework program of four workshops is specifically tailored to career situations in science and science management. The workshop trainers will guide the mentees to find a fitting mentor for their individual concerns.

- **Workshop I:** 30 & 31 January 2024 (on site - Berlin)
- **Workshop II:** 13 & 14 May 2024 (online)
- **Workshop III:** 7 & 8 November 2024 (on site)
- **Workshop IV:** 15 & 16 May 2025 (online)
