

Tal Ben Ezra: How do changes in nutrient dynamics impact phytoplankton & microbial populations?

PROGRESS

nutrient enrichment
experiments (48-hr incubation)
in different seasons - 2.5 years,

Parameters measured: APA,
chlorophyll a concentrations,
and cell counts.

During the METEOR cruise we
conducted long incubation
experiments (5 days) to
compare the responses over
time.

PhD thesis – Tal Ben Ezra,
supervisors - Mike Krom, Ilana
Bermn-Frank)
